### INSTALLATION AND USE

VX pumps are recommended for domestic, civil and industrial applications in all cases where the water contains suspended solids up to Ø 50 mm, for example **groundwater, surface water, sewage and dirty water**.

They are for example suitable for draining flooded areas such as cellars, underground car parks, car washes, for emptying cesspools and for sewage disposal.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

with thermal overload protector incorporated into the winding

**VX:** three-phase 400 V - 50 Hz

- Insulation: class F
- Protection: IP X8

### 11 POWER CABLE

Power cable encapsulated in epoxy resin both in the area of the grommets and at the point where the wires exit the sheath, resulting in an absolute insulation from moisture and water infiltration.

H07 RN-F" type  
(with Schuko plug for single-phase versions only)

#### Standard length:

- 5 metres for VX 8-10,
- 10 metres for VX 15-20
